

Community Advisory Panel Minutes

Date: Thursday June 20, 2019

Time: 12:30 p.m.

Adjourned: 2:45 p.m.

Place: 105 S. Main Street, Goodlettsville, TN. 37072

Present: Warren Garrett, Beverly Goodwin, Rose Baker, Greg Edrington, Mike Bertotti, Ritchie Taylor, Paul Davis.

Community Advisory Panel Minutes:

1. Discussed Quarterly for July 2019, proofread and finalized maps. Changed website address at bottom of page although the old one still worked for some reason. Great job by all and a special thanks to Rose for all the dedication to design and formatting.
2. Review of the APR was deferred to another date, we can review and update in July 2019 prior to deadline for the annual report to TDEC. We will be adding Hot Spots to the review under Post Construction. Paul indicated that TDEC was no longer auditing MS4's for the Post Construction requirements due to language not being final yet.
3. Power Point presentation to be created of our Advisory Panel and reviews, volunteerism etc. and the benefits to our program. This will be reviewed and edited by Rose prior to submission to TNSA for Conference. Beverly and I will tentatively be co-presenters in November at Montgomery Bell State Park.
4. Professor Dr. Ritchie Taylor provided an in depth review and power point of the Turbidity study performed on behalf of the City of Goodlettsville. The study is essential in future determinations of BMP effectiveness for our new construction sites. Dr. Taylor stated that further studies should be performed to enhance the overall numbers needed for proper determinations. Thank you Dr. Taylor for your expertise and time as well as the assistance of the students for this project. We look forward to more mutual studies in this area. The Stream assessments required by our MS4 permit, are also contracted with WKU and Dr. Taylors staff, we appreciate the continued professionalism and data provided to the City for compliance of the State Requirements. Dr. Taylor and students have also gone above and beyond in this year's study and will be providing break out information of scour areas, litter deposits etc. Thanks to all for the individual contributions to our panel.
5. Thanks to Rose and Allison again for the Post Construction online inspection sheet developed and added to our website for paperless reporting!

- **Next Meeting:** Thursday, July 18, 2019

Respectfully submitted,

W. Garrett

Stormwater Coordinator/Goodlettsville TN.

Forming Partnerships

Operators of regulated small MS4s are encouraged to utilize partnerships with other governmental entities to fulfill this minimum control measure's requirement. It is generally more cost-effective to use an existing program, or to develop a new regional or state-wide education program, than to have numerous operators developing their own local programs. Operators also are encouraged to seek assistance from non-governmental organizations (e.g., environmental, civic, and industrial organizations), since many already have educational materials and perform outreach activities.
